Projects

- Travel Mobile App: Individual Project | User Research

Designed mobile app dedicated to solving common anecdotal problems that exist when planning and booking a trip. Tools used: Photoshop, figma, Invision.

- Finishing School Academy: School User Interface Design: Group Project | User Interface Design

Designed mobile app targeting Gen Z and Millennial individuals seeking advice in fashion, finance, etiquette, and job search. Worked individually on creating full prototype and final fashion interface. Tools used: Photoshop, Miro, Figma.

- Government Agency Responsive Website Redesign | Group Project | User research and User interface

Redesigned mainpage of Federal Trade Commission website and created related mobile application for easy and trustworthy access to FTC information. Tools used: Miro, Trello, Figma, adobe Indesign, Invision

- Sign language Academy | Individual Project | User Research and User Interface

This app was a passion project that aims to solve the ancient old problem of creating communication between deaf and nondeaf peoples. The app utilizes pictures, videos, and innovative techniques to help to learn sign language and create easy access to communicating with individuals who have trouble hearing. Tools used: Miro, Figma, Photosop

- Non Profit Organization Redesign | Group Project | User Research and user Interface

Redesigned main page and donation page of Ferst Readers NGO. Retained overlook empathetic look of website while increasing trustworthiness by decreasing clutter, providing relevant donor and use statistics, and easy access to donation page. Tools used: Figma, Illustrator, Photoshop, Miro.

Experience

Shania Interiors, Interior – New York, NY

2009 - 2020

- Founded and operated interior design business providing services to provide optimal designs to clients, overseeing the redecoration of residential homes through demonstrated design expertise.
- Showcased available apartments by highlighting layouts and other marketable characteristics to clients, exercising communication and negotiation skill set to drive revenue and sustain satisfaction.
- Played a key role in collaborating with teams to develop materials and pallets to present to clients, strategically fulfilling requests and specifications.

Grid 2 International, Interior Designer – New York, NY

2008 - 2011

- Utilized AutoCAD expertise to design and recommend potential floor plans for commercial and residential clients, upholding optimum design quality and alignment with best practices.
- Contributed to the design of the 2008 Beijing Olympic floor plans, collaborating with up to 12 associates to provide innovative design recommendations in line with Olympic requirements.
- Oversaw projects related to the interior design of retail and commercial spaces. Maintained furniture, fixtures, and equipment (FF&E) documentation to inform decision making on current projects, aligning with client specifications.
